

IONIZER PRO

Neutralizes static electricity

050290

Static electricity is a natural phenomenon that causes problems for painters during the painting process.

WHERE DO WE FIND THESE PROBLEMS?

During the usual painting, degreasing and sanding processes.

The friction between a cloth and car surface would generate an electrostatic charge. This accumulated charge draws specks of dust or fibers which may present a serious problems.

Static causes problems such as:

- Marks
- Halos
- Specks of dust
- Excess paint

Even the slightest touch would usually cause static electricity.

The result is an excessive consumption of materials, time and money.

Bossauto presents the Ionizer Pro, an owner-produced product which neutralises static electricity and facilitates an homogeneous application of materials in the painting process.

Ionizer Pro works with compressed air, thanks to its airflow large surfaces can be covered allowing the static to be easily neutralized. It is used in the same way as if you were painting.

WITH THE IONIZER PRO GUN WE GET:

- Excellent finish
- We reduce the consumption of materials, we save on working time in future corrections.
- Money savings

Control the static with Ionizer Pro, go forward into the future and experience new ways of saving costs with excellent results.

The IONIZER PRO equipment is composed of:

- 1 Ionizer Pro Gun**
 Conector: 8 mm
 Laser pointer
 Battery indicator
- 2 Charger**
 3-hours charge for a full charge
 4-6 hours of continuous work
- 3 4 power adapters**
 To plug the Ionizer Pro in different countries
- 4 Magnetic holder**

THE HIDDEN COSTS OF **STATIC ELECTRICITY**

NOT USING IONIZER PRO

2.000€ estimated cost in paint per month.

Supposing that the average quantity of works (cars to paint) a workshop has in a month is **11**, and the correction of only one work takes an hour, if we pay to the worker **35€** per hour, all those corrections would suppose **385€** per month.

TOTAL MONTHLY COSTS: 2.385€
TOTAL ANNUAL COSTS: 26.235€ (11 MONTHS)

USING IONIZER PRO

1800€ estimated cost in paint per month. **(10% saving).**

By using the Ionizer Pro our works can be done faster and better, which means the reduction of an **80%** of the **reviewing and correcting time**. The monthly cost would be reduced down to **77€**.

TOTAL MONTHLY COSTS: 1.877€
11 MONTH COST: 20.647€
MONTHLY SAVINGS: 508€
11 MONTH SAVINGS: 5.588€

Investment recovered in about 1 /2 months approx.

Some other **benefits** of using **Ionizer Pro**:

- Easy to use.
- Faster application with metallic colors.
- Eases the paint application.
- The surface is covered faster during the painting process.
- Eliminates the emergence of shadows.
- Reduces dust by 80%.
- Reduces the consumption of polishing products, electricity, etc.
- The finishes are better and without overloads of paint, which reduces the consumption at 10-15% less.
