

# VPRO FOAM MASKING TAPE

PERFECT **FOAM** DENSITY

**BOSSAUTO**  
Everyday Improving

Ref. 106685 Ref. 106680

This innovative high-quality foam comes with an unspoilt adhesive, which when applied to the vehicle allows for better adhering. Furthermore, the new adhesive formula will not leave glue residue when it is removed from the vehicle. The 13 mm and 19 mm **VPRO** box is larger by design not only to accommodate the 50m (164 ft.) and 35m (114,8 ft.) of product, but to improve its functionality. Our new unwinding system improves the work process and eliminates the risk of ripping the foam.

## THANKS TO THE V SHAPE YOU WILL GET:

**Unspoilt adhesive**  
**Easy unwinding**  
**More product**

## MAIN CHARACTERISTICS:

- Virgin/unused adhesive.
- Soft dispensing, easy to pull.
- Innovative and high quality product.
- Bigger box with more product.
- Excellent functionality.
- No danger of ripping the foam.
- High quality adhesive which does not leave any residue.
- More volume in the foam that allows to cover bigger spaces.
- Perfect density foam.
- No material loss; 10% or 5/6 meters saving in every roll of foam masking tape.
- Improved dispensing efficiency in the working process thanks to its easier and faster unwinding.

# PERFECT LINE

## PERFECT EDGE FINISH

Ref. 106730

**25 metres**

### Made of two types of foam:

- 1 Polypropylene
- 2 Polyethylene

**PERFECT LINE** high density foam masking tape is made of two foam types: polypropylene and polyethylene. Due to the flat design and consistent adhesive of the semi-rigid foam, it can be placed on edges quickly and easily. When **PERFECT LINE** is attached to the edge of a surface it keeps paint from going into jambs, and it creates a 90° paint edge almost imperceptible to the eye. **PERFECT LINE** leaves no glue residue behind like other competitive product.

### PRODUCT FEATURES

- Easy placement.
- Perfect edge finish (almost imperceptible).
- Protective paper on glue edge.
- 25 m long roll (82.02 ft.).
